Enrichment & Personal Development

At Queenborough School & Nursery, Personal Development and enrichment are at the heart of our curriculum, providing every child with opportunities to discover their interests, develop their skills, build confidence and broaden their horizons.

Our enrichment offer is strategically aligned to our school vision, our children's needs and our local context. We provide a broad range of purposeful experiences across arts and culture, sport and physical activity, nature and the outdoors, civic engagement, and wider life and future skills. Through trips, residentials, performances, sporting opportunities, creative experiences, leadership, community engagement and encounters with professionals, we ensure that children experience opportunities both within and beyond their local community.

We are committed to an inclusive and accessible offer, ensuring that barriers such as disadvantage, additional needs, cost or geographical isolation do not prevent children from participating. We work with parents, pupils, staff and a wide range of partners to shape and strengthen our provision, celebrating participation and achievement and helping children recognise the skills they develop through enrichment. Our enrichment offer focuses on outcomes and is continually evolving. We consider how experiences contribute to children's confidence, belonging, wellbeing, cultural capital, essential skills and future aspirations, using participation, feedback and pupil voice to identify gaps and improve our offer.

Ultimately, we want every child to leave Queenborough having experienced something they had never experienced before, discovered something they love, developed skills for their future and understood that their possibilities extend far beyond their immediate community.
